

## DATALOGIC AUTOMATION POLICY FOR ENVIRONMENT

## Datalogic Automation policy for environment

Datalogic Automation is certified ISO 9001 for Quality System and ISO 14001 for Environment.

A goal for Datalogic Automation is to reduce the environmental impact of our electronic products and manufacturing processes, starting from the design to the end life cycle.

We are working to reduce the energy consumption for our product and our facilities, by using the best available techniques.

New product's development is aimed at reducing energy consumption and product package dimensions, without jeopardizing quality and performance but reducing the quantity of waste to recycle.

All our employees, suppliers and partner are involved in this process to better satisfy the customer's necessity and contribute for a sustainable development of the world.

All our products are manufactured in Conformity with the European RoHS Directive 2011/65/EC (ex 2002/95/EC), PFOS Directive 2006/122/EC, Reach Regulation (1907/2006) and WEEE Directive 2012/19/EC (ex 2002/96/EC).

## ISO 14001:2004 Environmental Management System

Datalogic Automation carries out a careful and continuous supervising of rules related to environment, health and safety to grant the full compliance with the law regarding products and processes.

Datalogic Automation dedicates a particular and constant attention to health and safety of its workers as well as of the community where it operates, as it considers human resources as a greatness of value for the company.

Datalogic Automation carries out environmental policy to save environment by minimizing the environmental impact and the related risks, by using eco-compatible technologies, and directly involving its suppliers and workers.

The commitments on environmental health and safety in the workplace are subject to an annual improvement program, maintained monitored by specific performance indicators (KPI=Key Performance Indicator).

## RoHS Directive (2011/65/EC)

RoHS Directive 2011/65/EC of the European Parliament and of the Council of 8 June 2011 on the Restriction of the use of certain Hazardous Substances (RoHS) in electrical and electronic equipment, and do not contain, beyond the authorised threshold, the substances listed in the Annex II of the Directive. Lead (0,1%); Mercury (0,1%); Cadmium (0,01%); Hexavalent chromium (0,1%); Polybrominated biphenyls (PBB) (0,1%); Polybrominated diphenyl ethers (PBDE) (0,1%). PerfluoroOctaneSulfonate (PFOS) is also absent (Directive 2006/122/EC).

Starting from May 2, 2006 Datalogic Automation has been revised its internal manufacturing processes and products complying them to the RoHS Directive requirements, without compromising the quality and reliability level, even if the products are excluded from the Directive provisions.

Consequently all the products manufactured and sold by Datalogic Automation, after the aforementioned date, are compliant with the requirements of 2011/65/EC Directive.

The new RoHS Directive 2011/65/EC starts from 02/01/2013.

The products would be considered excluded from the RoHS Directive because are:

- not included in the categories of Annex I;
- in accordance with Art. 2.4.c as "specifically designed, and is to be installed, as part of another type of equipment that is excluded or does not fall within the scope of this Directive, which can fulfil its function only if it is part of that equipment"

## REACH Regulation (1907/2006)

REACH Regulation (1907/2006) of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency (ECHA). The Regulation is principally aimed at manufacturers and importers of chemical substances and contains provisions involving “downstream users” i.e. distributors and users of chemical substances.

Datalogic Automation, according to the REACH requirements, is qualified as a downstream user and in particular, as a “manufacturer of goods” where goods, according to the Regulation, is referred to any product, component or subassembly.

Datalogic Automation has revised its relationship with the Suppliers and its internal manufacturing processes and products complying them to the REACH Regulation requirements, without compromising the quality and reliability level, even if the products are excluded from the Regulation provisions. Consequently all the products manufactured and sold by Datalogic Automation are compliant with the requirements of 1907/2006 Regulation, and do not contain any of the substances of very high concern included in the Candidate List published by the European Chemicals Agency (ECHA) in accordance with Art. 59 in a concentration above 0.1% weight by weight (w/w) and above 1 tonne/year.

The REACH Regulation 1907/2006 starts from 01/06/2007. Datalogic Automation informs that:

- the goods supplied by Datalogic Automation are exempted from the REACH requirements and cannot be qualified as “chemically dangerous goods”;
- Datalogic Automation can not be qualified as a manufacturer/importer of substances according to the REACH Regulation and thus is not obliged to fulfil registration or pre-registration;
- Datalogic Automation has performed all activities necessary to comply to the provisions of the REACH Regulation. In particular:
  - Creation of communication channels with the supply chain to evaluate if the substances used are subject to restrictions or authorisations, to find alternative suppliers, in order to guarantee the continuation of the supply.
  - Constant evaluation of substances used in the goods in order to identify and communicate the presence of substances classified as SVHC (Substances of Very High Concern) according to the article 33 of the REACH Regulation and included in the “Candidate List” (Annex XIV) published by the European Chemicals Agency (ECHA) updated on 19/12/2012 and subsequent upgrades.

## WEEE Directive (2012/19/EC)

WEEE Directive 2012/19/EC of the European Parliament and of the Council of 4 July 2012 on Waste Electrical and Electronic Equipment (WEEE).

The Directive aims to minimize the impact of electrical and electronic equipment on the environment during their life cycle and when they become waste. It applies to a wide range of products, encourages and imposes criteria the design, collection, treatment, recycling and recovery of waste electrical and electronic equipment. The Directive requires that producers responsible for financing many activities (product liability).

The WEEE Directive 2012/19/EC starts from 13/08/2012. Datalogic Automation informs that:

- Datalogic Automation products don't fall in the categories listed in the Annex I of the Directive;
- According to Art. 2a Datalogic Automation products are exempted to be officially compliant until 15/08/2018;
- Are exempted to present the relative symbol of Annex IX (bin).
